

## Five Day Program on Advanced Project Management Concepts & Best Practices

The George Washington University, D.C., USA 

**October 9 - 13, 2017**

Since 2011, i2P2M has trained 664 top-notch professionals from 89 companies in the field of executive education. Five day program is recommended for all those who would like to LEAD.

### Class of 2011

NASA Administrator, Charles F Bolden Jr addressing the Indian delegation. It was a rare treat to listen to the Administrator who is an Astronaut and Head of NASA. He laid emphasis on 'holistic' thinking and humility to learn.

### Class of 2012

(GWU, USA) Interaction over Dinner on Oct. 15, 2012 between participants of IEDPM and the Faculty from The George Washington University, The World Bank and from NASA. This was followed by a Group Photo.

### Class of 2013

Program Executive of NASA giving a presentation on 'Best practices in managing projects and programs keeping in view cultural issues'.

### Class of 2014

10 senior scientists of DRDO, Ministry of Defense, went through the world class International Executive Diploma in Project Management (IEDPM). Participants with Dr. Forman, Dr. Khamooshi and Dr. Giridharadas of GWU School of Business along with DRDO Scientists.

### Class of 2015

We had 70 participants from 30 companies that participated in the 5 day program in USA. Participants listening to the speakers from NASA at the NASA Goddard Space Flight Center (GSFC) in Maryland.

### Class of 2016

Over 50 participants who attended the 5 day training in USA are seen at the Goddard Space Flight Center. 5 renowned speakers from NASA spoke on the advanced concepts in project management.

**Venue:** The George Washington University (GWU), Washington D.C.  
**Dates:** 9 -10-11 October 2017  
**Faculty:** Eminent and well known professors of the GWU which is one of the foremost universities in USA in the field of project management

### **Leadership Development** (09 October 2017) 0930-1230 hrs

Prof. Shyam Giridharadas: is a Visiting Assistant Professor of Management for The George Washington University School of Business (GWSB). He has 25 years of experience in top management consulting at McKinsey & Company and Prism Consulting International.

Are leaders born or cultivated? This question is frequently asked since last many decades. By and large the consensus is in combining the two. Shyam with his enormous experience in leadership development would cover the major aspects in leadership development. At the end of this module, participants will learn the major attributes of a leader, authentic leadership and challenges in becoming leaders in one's own right. Authentic Leadership is the master key to integrate multi cultural teams with diverse background.

### **Strategic Project Management** (09 October 2017) 1330-1630 hrs

Prof. Homayoun Khamooshi: Ph.D. in Management Science Lancaster University, 1994. Is Chair of GWU's internationally known Master of Science in Project Management Program. Area of Expertise: Project Planning and Scheduling, Project Risk Analysis & Modeling.

At the end of this module participants will have an understanding of various elements of estimation techniques along with cost management with implications to contracting. The candidates should be able to: • Differentiate between project and program cost objectives and how these are used to assess the success and failure of projects and programs. • Understand the foundation of cost estimation for projects • EVM as an effective performance management system in managing technical projects and portfolios. • Design and develop an appropriate control system for managing costs.

### **Executive Decision Making** (10 October 2017) 0930-1230 hrs

Prof. Ernest Forman: D.Sc., The George Washington University, 1975 and MS, John Hopkins University. Area of Expertise: Decision Making; Resource Allocation and Forecasting Current Research: Executive Decision Making & Project Portfolio Management.

At the end of the module participants will have a good understanding of concepts and methods for making complex decisions in business and government for identifying objectives and alternatives; for setting priorities and for making group decisions. The candidates should be able to: • Structure complex decision problems • Identify alternatives • Identify constraints • Investigate sensitivity of decisions • Communicate recommendations and rationale • Deal with group decisions and conflict.

### **Systems Thinking in Project Management** (10 October 2017) 1330-1630 hrs

Prof. Sanjay Jain: is an associate industry professor in the Department of Decision Sciences at the School of Business at the George Washington University (GWU). At GWU, he teaches graduate classes in the MS programs in Project Management and Business Analytics, and in MBA.

At the end of this module, participants will be able to link conceptual framework of System Thinking to effective project planning and execution. With his vast experience, he will be able to give case examples of the successful projects to its interconnectivity with the system's thinking. One of the characteristics of System Thinking is to link the 'whole' with 'parts' with constant feedback mechanism for taking corrective measures. System thinking also produces a common denominator for team players to plan and execute projects effectively.

### **Procurement and Contracting** (11 October 2017) 0930 -1230 hrs

Peter R. Easley, Esq – The World Bank, Washington DC. He is the senior Procurement Officer in the World Bank and a well known authority on Procurement and Contracting management. He is widely traveled with rich international experience.

At the end of this module participants will have a good understanding of procurement and contracting and its impact on success of the project. The candidates should be able to: • Discuss procurement and contracting processes and principles • Explain and critically evaluate the contract administration issues including contract terms, issue management, cost management, change order management • Understand programs, planning, sourcing and contractual design for diverse acquisitions • Understand the concept of negotiation for contracts and modifications.

### **Advanced Supply Chain Management** (11 October 2017) 1330-1630 hrs

Prof. Shivraj Kanungo: Ph.D., The George Washington University, 1993 and MS Southern Illinois University. Area of Expertise: IT Management; Software engineering; IS evaluation. Modeling approaches in Supply Chain Management; Optimization of Cost and Service.

At the end of this module participants will have an understanding of designing and implementing an effective supply chain system. The candidates should be able to: • Modeling approaches in supply chain management • Optimization of cost and service • Alternatives available to the manager given the economic situation • Competitive conditions, • Regulatory environment of the several transportation modes • Model location theory and logistics network and planning and design.
